

W2D2 Memo 3

04 November 2022

Hello W2D2 participating teachers,

If this is your first W2D2 Memo of 2022 and it has come by direct email then this is confirmation of your registration. Our moderators are in Cc – moderators, this is for you as well.

Here is the latest information:

- We are a little less than one week from the big day!
- The [W2D2 Schedule of Videoconferences](#) is now available! It lists cities by location and time along with moderators. **Teachers and moderators both: please check to be sure the schedule works for you and, if there is any problem, contact Ken as soon as you can.**
- We still need moderators for several of our videoconferences, especially between 01:00 and 09:00 UTC (02:00-10:00 CERN time, 17:00-03:00 Fermilab time). If you know a physicist who can jump in, please have them contact us.
- Please remember that we have resources to help you and your students to understand World Wide Data Day. Most are on the [W2D2 Homepage](#). Scroll down and look under Resources. Beneath that, you will find an archive of Memos, including this one. “Intro” and “How to” videos are on the [ATLAS](#) and [CMS](#) pages. Please use them!
- More questions? We will have a Q&A session for moderators and teachers 15:00-16:00 UTC on Monday 7 November via Zoom. You can find the Zoom channel on the [Q&A Indico page](#). Please do not give the link out to students at this time. Can't make it? The meeting will be recorded. Please note: *if you join the meeting you are consenting to the recording and its availability on the web.*
- Students and teachers sometimes ask about the motivation and meaning of the Φ measurement. For an insight, please check my [interview with moderator Andrea Gozzelino](#) about that measurement and share it with your students.

Even more questions? Send them!

All the best,

Shane and Ken
