W2D2 Memo 5 16 November 2026

Hello W2D2 participants,

Welcome to our post-W2D2 Memo! There are several items of interest:

- **Post W2D2 Teacher Response Form.** Your voice is important! To be sure we (A) get an accurate count of W2D2 groups and numbers of students and (B) learn from you about the quality of World Wide Data Day and how we can improve, **we ask that you fill out the Teacher Response form at https://forms.gle/DxQZ3PpgpPY2nhrf8 by the end of this month**.
- **Makeup W2D2 videocon.** It seems a few groups missed their videoconferences last Tuesday for various reasons, so we have a makeup day next week on Monday 23 November with six different times available**. If you need a new videocon, register this week at https://forms.gle/X1gaJcj1m6tHkCKH9**.
- **Looking for more? – Coding W2D2.** QuarkNet fellow Mike Wadness has come up with a rich coding activity that your students can do. It enables students to automate the same measurement as in W2D2 (and more) with 100K dimuon events:
  - Full activity on Google Colab with angle measurement and more available.
  - Light version with only the W2D2 angle measurement.
  - Start guide, including instructions in case you cannot run Colab.
- **Looking for more? – Masterclasses.** Register for International Masterclasses, coming February-April 2027. Find out more in the latest IMC Circular and at the IMC website.

Do you have questions? Concerns? Please contact us.

Finally: Thank you for your participation in World Wide Data Day 2026. It has been a privilege to work with you and your students. And thanks again to our great moderators!

See you soon,

Ken and Shane
