

Big Analysis of Muons 2021

20 May 2021

Hello all,

The ATLAS and CMS data assignments for BAM are now available in the [BAM Data Assignments page](#).

Notes:

- Data is assigned by "Institute". Your Institute is designated by the city or town of your school or other institution and an additional identifier where there is more than one Institute per city or town.
- To understand the data or event file numbering system of each measurement, one needs to understand the event display. Please consult the [ATLAS student page](#) or the [CMS student page](#).
- Teachers/professors/leaders should assign students their event or data files (one file:two students) from what their institute is assigned. If you need more data, let me know as soon as you can.

More soon.

Ken
